Summary

Software and AI Engineer with **4+ years of professional experience**, including building **Python** backend services, **REST APIs**, asynchronous data pipelines, and cloud deployments. Hands-on experience with **FastAPI, Django, Celery, AWS, PostgreSQL, and MongoDB**, including L3 production support for telecom systems. Currently developing **Retrieval-Augmented Generation (RAG)** and **LLM** applications for a multi-tenant Enterprise Intelligence platform.

Experience

Software and AI Engineer II
Jul 2026 – Present

Alethic Insights (via HealthMinds Technologies) — *Bengaluru, India*

- Building an end-to-end **Retrieval-Augmented Generation (RAG)** system for a multi-tenant Enterprise Intelligence SaaS platform, integrating enterprise data sources including **Power BI** and **SharePoint**.
- Developing data ingestion, document processing, chunking, embedding, and knowledge-base retrieval workflows using **PostgreSQL with pgvector**; combining vector similarity search, **BM25**, and **top-k retrieval** to provide relevant context to **OpenAI LLMs**.
- Building the **Delivery Health intelligence layer** to analyze account and project data, surface risks and escalations, and generate actionable insights for users ranging from **CXOs** to delivery teams, with drill-down views from executive summaries to account-level details.
- Designing interfaces in **Figma** and building full-stack features with frontend integration and **FastAPI** backend services.
- Automating cloud infrastructure provisioning and service deployments using **AWS CDK**.

Software Engineer
Oct 2024 – Jul 2026

OpenText (via Mastercom Technologies; Client: Vodafone Idea) — *Bengaluru, India*

- Owned end-to-end production deployment of **FastAPI** microservices on AWS with **Nginx** reverse proxy; configured SSL termination, rate limiting, and load balancing for a telecom analytics platform
- Led **L3 production support**: diagnosed critical live failures, maintained SLA compliance, and reduced MTTR via structured root-cause analysis and runbook documentation
- Managed **CI/CD** release pipelines using Git branching (feature → staging → prod) with code review gates and rollback procedures, ensuring zero-downtime deployments
- Designed and developed an AI-powered prediction service using **LLMs** and machine learning models to analyze telecom operational data, generate contextual predictions, and expose inference through scalable **FastAPI** REST APIs; optimized prompt engineering, response validation, and backend integration for production workflows

Associate Product Engineer
Jul 2023 – Oct 2024

Crediwatch — *Bengaluru, India*

- Architected **Celery**-based async pipelines for financial early warning signals — 3-stage flow: Fetch (MySQL, MongoDB, APIs) → Transform (Pandas, NumPy) → Persist (MongoDB) — ensuring data integrity at scale
- Containerized services with **Docker & Redis**; deployed on **AWS ECS** improving service isolation and horizontal scalability
- Delivered REST APIs consumed by analytics dashboards; collaborated cross-functionally with product and data science teams to iterate on signal definitions
- Mentored 3 engineering interns: conducted code reviews, onboarding, and sprint planning

Software Engineering Intern
Dec 2022 – Jun 2023

Crediwatch — *Bengaluru, India*

- Built a **Django**-based maker-checker approval workflow with multi-role authorization; integrated **Google OAuth 2.0** into Django Admin and developed UI using Django templates
- Wrote unit tests ensuring code coverage and regression safety across approval flows

Medical Technical Coordinator
Feb 2022 – Dec 2022

Maxlife Health Enterprises Pvt Ltd

- Worked on medical software and hardware support, leading the field engineering team and coordinating technical service activities
- Used **Zoho** and **Microsoft Excel** for day-to-day coordination, record management, and reporting

Projects

AI Resume Builder for Veterans *Python, FastAPI, Hugging Face Transformers, T5*

- Built an AI-powered resume optimization system using **TF-IDF** and **Logistic Regression** to evaluate and improve resume relevance against job descriptions
- Built **FastAPI** backend for veteran profile ingestion, T5 inference for skill translation, and dynamic **LaTeX**-based resume generation; integrated keyword optimization against job description embeddings

AI-Powered Content Delivery System *GCP, JavaScript APIs — Google MLB Hackathon*

- Designed a system to deliver real-time personalized sports content using GCP and data-driven approaches
- Built RESTful APIs and integrated AI model outputs for dynamic content based on user interactions

LoanLens AI: AI-Assisted Loan Processing

Python, FastAPI, React, TypeScript, SQLAlchemy, scikit-learn

- Built a local loan-processing prototype with **9 REST API endpoints**, normalizing **CSV, Excel, JSON, and PDF** inputs and consolidating applicant documents into a single case
- Implemented **TF-IDF and Logistic Regression** for applicant-remark sentiment analysis and rule-based fraud and credit-risk scorecards with explanatory reasons and processing logs
- Designed the Phase 2 **Agentic RAG** architecture with **BM25**, dense retrieval, metadata filtering, and reranking for cited policy retrieval, cross-document verification, and human-reviewed decision support

Technical Skills

Languages: Python, JavaScript, TypeScript, Golang (Basics)
Frameworks & Libraries: FastAPI, Django, Flask, Pandas, NumPy, Playwright, Selenium, SQLAlchemy, scikit-learn, Transformers (T5)
Frontend & Design: React, TypeScript, Figma
Cloud & DevOps: AWS (ECS, EC2, S3, CDK), Docker, Nginx, Uvicorn, Git, CI/CD, Linux
Databases: PostgreSQL, pgvector, MySQL, MongoDB, Redis, Hadoop
Messaging & Async: Celery, RabbitMQ, Redis Queues
Concepts: REST APIs, Microservices, System Design, Data Pipelines, RBAC, Distributed Systems
AI/ML: LLM APIs, Prompt Engineering, RAG, Embeddings, BM25, TF-IDF, Logistic Regression, Transformer Models

Education

PES University Jul 2024 – Oct 2026
M.Tech in Data Science, AI & Machine Learning (Weekend Program) *Bengaluru, India*

Visvesvaraya Technological University (AIT) Aug 2017 – Aug 2021
B.E. in Medical Electronics *Bengaluru, India*
